Sustainability Keynote Speaker

Elba has a reputation for dynamic audience engagement sharing her relatable diverse experiences from her 26-year career at transportation giant UPS. Her sustainability presentations and workshops can be tailored to your audience and purpose. Popular themes:

What is sustainability?

Helping everyone understand what it is and why it matters.

Supply chain resilience through sustainability.

Gaining a basic understanding of the components of ESG that build resilience and mitigate risk in your company's value chain.

Navigating the perilous ESG terrain.

ESG has been attacked lately. Business leaders can differentiate themselves by understanding and leveraging the truth for the benefit of their organization's stakeholders. Come away with 5 actions you can apply today to de-risk the business opportunity.

Understanding Scope 3 emissions for business leaders.

Regardless of size or entity structure, companies will be under greater scrutiny to inventory their carbon emissions and mitigate their impact on society. Understanding Scope 3 greenhouse gas inventory basics is a necessary risk management skill for today's leaders.
